

H. Robert Superko, MD, FACC, FAHA, FAACVPR

Dr. Superko in his career of over 35 years has focused on research and clinical work on the metabolic and inherited aspects of heart disease and atherosclerosis. He has completed multiple NIH trials, has had numerous publications, founder of Berkeley Heart Lab, and past Director of the Stanford University Lipid Research Clinic and Lab, Director of Cholesterol research Center at University of California Berkeley, along with others.

We offer genetic cardiovascular consultations with Dr. Superko as a service of PRIMA HEART, as well as addition of genetic laboratory testing services.

Please see SERVICES - PREVENTIVE ASSESSMENTS.
